

If process inefficiencies, like access, storage, sharing and retention are holding you back from advancing your journey to digital pathology, Iron Mountain can help. Visit [ironmountain.com/digitalpathology](http://ironmountain.com/digitalpathology) to learn more about our digital pathology services.

## DIGITAL PATHOLOGY ON-DEMAND SERVICES

---

You're **moving toward a digital information environment** and pathology slides continue to be an important part of your workflows and archives. You would love to have a full conversion to digital but 100% conversion of all of those slides may not be a cost-efficient practice. Instead of spending hundreds of thousands of dollars scanning slides you'll never look at again, why not try digital pathology on demand - scanning the slides you need, and only the ones you need, when you need them.

**You need regular access to critical pathology specimen information**, but managing an ever-growing inventory of glass slides in local storage consumes valuable real estate, requires additional staff and resources, and leaves your organization at risk of information loss and unbudgeted spending.

**As your organization transitions to a digital way** of working and incorporates remote access to pathology data, **you need to rethink your pathology storage and access strategy**. Iron Mountain's digital pathology on-demand services store your glass slides in a secure, compliant offsite facility, allowing you to retrieve your assets in either physical or digital form based on your needs.

---

### QUICK ACCESS TO HIGH PRIORITY PATHOLOGY SAMPLES

Iron Mountain's digital pathology on-demand services allow you to choose from same day or next day delivery of your information. We pull the correct accession and produce high resolution images of the slides so that we can facilitate speedy delivery and enable integration with your Laboratory Information System (LIS) or our own digital storage cloud solution.

## DIGITAL TRANSFORMATION SUPPORT

Iron Mountain provides the equipment, trained personnel and expertise to help manage your workflow processes — from digitizing your pathology samples when they are requested to storing your digital and physical samples for easy tracking and retrieval.

---

### BENEFITS

- > Digitize only what is truly used; no need to digitize your full inventory, as this can be very costly
- > Gain quick access to your pathology samples through our on-demand same day or next day services
- > Increase efficiency and productivity in your lab
- > Improve information sharing by simplifying digital access to second opinions from remote colleagues and/or enabling access to specialists around the world
- > Reduce the risk of lost or damaged glass slides
- > Improve adherence to legal requirements through our retention guidelines

---
