

SOLUTION BRIEF

IRON CLOUD BACKUP FOR MICROSOFT 365 POWERED BY VEEAM®

CREATING AN EFFECTIVE STRATEGY FOR PROTECTING MICROSOFT 365 DATA

INDUSTRY FACT

ACCORDING TO THE ENTERPRISE STRATEGY GROUP (ESG), ORGANIZATIONS ARE ALWAYS RESPONSIBLE FOR THEIR DATA AND ITS RECOVERY, SO SOLELY RELYING ON SAAS VENDORS FOR DATA BACKUP IS A MAJOR MISTAKE.

THE EVOLUTION OF DATA PROTECTION CLOUD STRATEGIES, ENTERPRISE STRATEGY GROUP (ESG), 2021

BUSINESS CHALLENGE

SaaS productivity apps like Microsoft 365 provide a wide array of powerful services and make sense in today's remote world – the benefits of easy access to documents from any device and improved collaboration are obvious. However, many organizations don't realize they are responsible for backing up Microsoft 365 data, not Microsoft. Some of this confusion comes from Microsoft 365 offering to provide some safeguards to prevent data loss. Many organizations wrongly believe that because data is in the cloud, it is automatically backed up or that Microsoft OneDrive file sync is a replacement for backup. These are all misconceptions. It's your data -- and it's your responsibility to protect it. Backup is as equally important for Microsoft 365 as it is for any other application.

WHAT IF YOU COULD

- ▶ Establish comprehensive data protection for the entire Microsoft 365 suite
- ▶ Perform data restorations either at site-level or of granular data such as mailboxes or projects to minimize data loss
- ▶ Run backups up to four times per day, with flexible retention options to minimize downtime
- ▶ Work with a trusted advisor to ensure all the data that runs your organization is protected 24/7/365

INTRODUCING IRON CLOUD BACKUP AND REPLICATION POWERED BY VEEAM

Iron Cloud Backup for Microsoft 365 Powered by Veeam eliminates the risk

of losing access and control over your Office 365 data, including Exchange Online, SharePoint Online, OneDrive for Business and Microsoft Teams, so that your data is always protected and accessible.

Iron Cloud Backup for Microsoft 365 Powered by Veeam offers multiple options for recovering data in Microsoft 365 applications. Our solution has purpose-built backup and recovery capabilities you can rely on to ensure your Microsoft 365 data is backed up and recoverable. No matter the cause or extent of any data loss that might occur, your IT resources can recover what they need to and ensure users have access to their Microsoft 365 data when they need it most. Customizable settings also enable you to increase or decrease the frequency of backups and set the timing of each backup.

KEY FEATURES AND BENEFITS

Iron Cloud Backup for Microsoft 365 Powered by Veeam can help you protect the entire suite of Microsoft 365 services, including Teams, OneDrive, Exchange, SharePoint, Planner and Skype for Business. With Iron Cloud Backup for Microsoft 365 Powered by Veeam, you can:

- Protect your Microsoft 365 data from accidental deletion, security threats and retention policy gaps
- Quickly restore individual Microsoft 365 items and files with industry-leading recovery flexibility
- Meet legal and compliance requirements with efficient eDiscovery of Microsoft 365 backup items

Iron Cloud Backup for Microsoft 365 Powered by Veeam lets you backup weekly, daily or as often as every five minutes in Microsoft's native format so you can easily retrieve your data. Our solution stores backups in the location of your choice – on-premise, in the cloud, or with a service provider, and offers flexible and robust features to minimize downtime and the impact of data loss.

With Iron Cloud Backup for Microsoft 365 Powered by Veeam, you can rely on quick search and granular recovery of individual objects, including Microsoft Teams data, which can be used to restore whenever needed. E-discovery also becomes easier since you now have an accessible copy of your data, so retrieving emails for regulatory or compliance reasons is no longer costly, time-consuming and a major disruption to your business.

WHAT YOU GAIN

Iron Cloud Backup for Microsoft 365 Powered by Veeam is purpose-built for backing up the data created by Microsoft's suite of productivity applications. It's flexible configuration options and robust capabilities ensure you can achieve your organization's recovery objectives with ease. Our solution is designed to help with everyday data protection scenarios and the possible data loss events you are most likely to encounter. Whether it's ransomware infections, accidental deletions from human error, or permissions overwriting and more, Iron Cloud Backup for Microsoft 365 Powered by Veeam has you covered.
